**Proclamation**  
•  
•  
•

**WHEREAS**, lung cancer is the leading cause of cancer death among men and women in the United States and Alabama, accounting for more deaths than colon cancer, breast cancer, and prostate cancer combined; and

**WHEREAS**, the 5-year survival rate for localized lung cancer is ~60%, yet only ~24% of lung cancers are diagnosed at this stage; and

**WHEREAS**, screening for lung cancer for high-risk individuals using low dose computed tomography can lead to the earlier detection of lung cancer and save lives, reducing the mortality by 20% when compared to screening by chest x-ray in the National Lung Screening Trial (3) and reducing the risk of death at 10 years by 24% in men and 33% in women as demonstrated by another large, randomized trial; and

**WHEREAS**, funding for lung cancer research trails far behind funding for research of many other cancers, and additional research is needed in early diagnosis, screening, and treatment for lung cancer as well as in lung cancer affecting women and lung cancer health disparities; and

**WHEREAS**, lung cancer incidence is decreasing twice as fast in men as it is in women, each year more women die from lung cancer than breast cancer every year and by 2035, it is expected that more women will die from lung cancer than men; and

**WHEREAS**, lung cancer in individuals who never smoked is the 7<sup>th</sup> leading cause of cancer-related death and accounts for 17,000-26,000 deaths in the US every year; and

**WHEREAS**, organizations working in the Opelika community, such as the American Lung Cancer Screening Initiative and Women's Lung Cancer Forum, are committed to educating about lung cancer and lung cancer screening and working to increase lung cancer screening rates in Opelika.

**NOW, THEREFORE, BE IT RESOLVED** that I, Mayor Gary Fuller, and the Opelika Council do hereby proclaim *November as Lung Cancer Awareness Month* in Opelika and recognize the need for research in lung cancer affecting women and lung cancer health disparities, and encourage all citizens, to learn about lung cancer and early detection through lung cancer screening.
