PROCLAMATION OBSERVING LUNG CANCER AWARENESS MONTH NOVEMBER 2022 P-2022-18

WHEREAS, lung cancer is the leading cause of cancer death among men and women in the United States and Monroe, accounting for more deaths than colon cancer, breast cancer, and prostate cancer combined; and,

WHEREAS, according to the Centers for Disease Control, there were 679 new lung cancer cases and 415 deaths because of lung cancer between 2015 and 2019 in Union County; and,

WHEREAS, the five-year survival rate for localized lung cancer is ~60%, yet only ~24% of lung cancers are diagnosed at this stage; and,

WHEREAS, screening for lung cancer for high-risk individuals using low-dose computed tomography can lead to the earlier detection of lung cancer and save lives, reducing the mortality by 20% when compared to screening by chest x-ray in the National Lung Screening Trial and reducing the risk of death at 10 years by 24% in men and 33% in women as demonstrated by another large randomized trial; and,

WHEREAS, funding for lung cancer research trails far behind funding for research of many other cancers, and additional research is needed in early diagnosis, screening, and treatment for lung cancer as well as in lung cancer affecting women and lung cancer health disparities;

WHEREAS, lung cancer incidence is decreasing twice as fast in men as it is in women, each year more women die from lung cancer than breast cancer and by 2035, more women will die from lung cancer than men; and,

WHEREAS, African Americans have the highest lung cancer incidence and mortality of all races, and disparities in lung cancer screening, diagnosis, treatment, and mortality are well characterized among African Americans and other racial minorities; and,

WHEREAS, lung cancer in individuals who never smoked is the 7th leading cause of cancer-related death and accounts for 17,000-26,000 deaths in the US every year, 60-70% of individuals diagnosed with lung cancer who never smoked are women, and the proportion of lung cancers diagnosed in people who never smoked is increasing in the US; and

WHEREAS, radon is the leading cause of lung cancer among individuals who never smoked and the second leading cause of lung cancer overall; and,

WHEREAS, the stigma surrounding lung cancer creates barriers to early diagnosis, treatment, and funding for research, has a detrimental impact on the quality of life of people diagnosed with lung cancer, and hinders awareness of and research into lung cancer risk factors other than smoking; and,

WHEREAS, lung cancer research is leading to breakthroughs in the identification of genetic alterations associated with lung cancer and in the development of lung cancer treatments, including immunotherapies and targeted therapies; and,

WHEREAS, organizations working in Monroe such as the American Lung Cancer Screening Initiative and Women’s Lung Cancer Forum, are committed to educating about lung cancer and lung cancer screening and working to increase lung cancer screening rates in Monroe.

NOW, THEREFORE, I, Marion L. Holloway, Jr., by virtue of the authority vested in me as Mayor of the City of Monroe do hereby proclaim November 2022 as Lung Cancer Awareness Month in Monroe and recognize the need for research in lung cancer affecting women and lung cancer health disparities, and encourage all citizens to learn about lung cancer and early detection through lung cancer screening.

Attest:

Marion L. Holloway, Jr., Mayor

Bridgette H. Robinson, City Clerk
